NELSON PLANT SERVICES

Nelson Plant Services (NPS), a division of Carl A. Nelson & Company, was created in 2002 to focus on small construction projects and industrial plant maintenance. NPS specializes in delivering quick turnaround projects. We are experienced in working safely in operating plants without interrupting production. We work flexible hours as required to accommodate your needs.

Our multi-trade personnel include millwright, mechanic, carpenter, rigger, welder, iron worker and cement mason skills. Our millwrights are skilled in dry material handling and major production equipment installation, preventive maintenance and repair. Complicated and exacting equipment foundations are a specialty of Nelson Plant Services. We have been selected to rearrange many production lines for improved efficiency due to our experience and personnel skills.

Our number one goal is to keep our customers' operations going, while maintaining a safe work environment for our clients and our crews. The following services are provided by NPS:

- Finish and Rough Carpentry
- Concrete Footings
- Steel Erection
- Concrete Foundations
- Office Remodels
- Production Process Alignment and Realignment
- Equipment Installation and Removal
- Architectural & Structural Design
- Code Analysis
- Code Studies
- Compliance Consulting
- Process Handling
- Standing Seam Roof Inspections & Maintenance
- Facility Maintenance

Safety is Our Top Priority

Carl A. Nelson & Company is committed to a program that ensures a safe working environment for every employee and trade contractor, prevents the loss of property, and conserves material/financial resources. Our positive attitude and diligent attention to safety at all levels of management are a crucial influence on completing any project.

The success of our safety program is a result of dynamic leadership, experienced field employees, and established relationships with subcontractors who share our commitment to safety excellence.

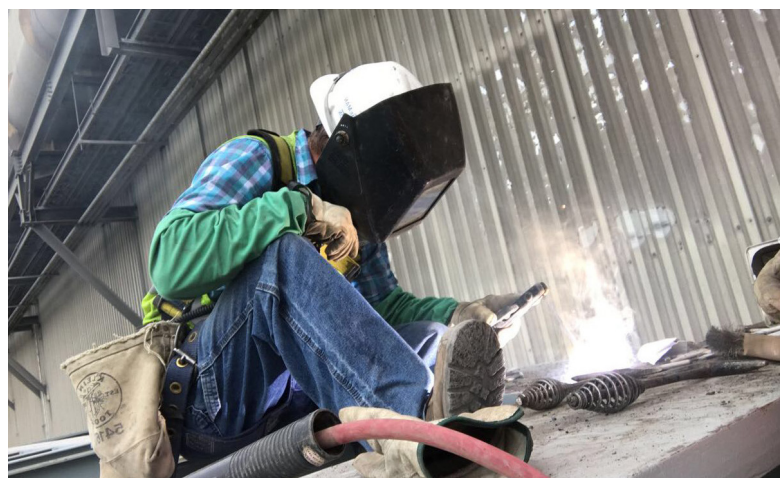

Over the last decade, our EMR, DART, and TRIR rates have been consistently below the national industry standard. In the past decade, we achieved 1,000,000 manhours without a lost day accident two times. In addition, we recently achieved 1,500,000 man hours without a lost day accident.

- Weekly Safety Meetings
- Site Specific Safety Plan
- Full-time Corporate Safety Management
- All Employees 10-hour OSHA trained
- All Field Supervisors 30-Hour OSHA trained

We work with many industrial clients that use a third party source to pre-qualify and manage safety performance and insurance requirements for contractors. Carl A. Nelson & Company is subscribed and/or qualified with: Apprux, Avetta, First Verify and ISNetWorld.

**We recently achieved
1,500,000 man hours
without a lost day
accident!**

**In addition, we have
achieved 1,000,000 man
hours without a lost day
accident for the second
time in a decade.**
